

EDUCATION

Degree	Institute/Board	Year
Bachelor of Technology	ABES Engineering College, Ghaziabad (AKTU)	2023–2027
Senior Secondary	SSMV, Shahjahanpur	2023
Secondary	Takshashila Public School, Shahjahanpur	2021

EXPERIENCE

- Kumele — Backend Developer (Freelance)

Jan 2026 – Present

Tech: NestJS, Node.js, TypeScript, PostgreSQL, Redis, Socket.IO

Remote

– Architected and developed **60+ RESTful APIs** for a social meetup platform using NestJS, PostgreSQL, and Redis.

– Implemented **multi-layered authentication** (JWT, Google OAuth, WebAuthn passkeys, TOTP 2FA) with role-based access control; built **real-time event chat and push notifications** using Socket.IO and Redis Pub/Sub.
- Fiverr — Freelance Web3 Developer

Jan 2023 – Present

Tech: Solidity, Next.js, Wagmi, Viem, Ethers.js, LayerZero, Chainlink

Remote

– Built full-stack DApps for clients across **10+ countries** with a consistent **5-star rating** — ERC-20/ERC-721 token contracts, staking systems, and **multi-token ICO launchpads** (audited) on Ethereum, Polygon, and Solana.

– Delivered **cross-chain swap platforms** using the LayerZero protocol (Wagmi v2 + Viem frontend) and Chainlink integrations for secure EVM interoperability.
- Contract.dev — QA Engineer (Part-time)

Nov 2025 – Jan 2026

Tech: Web3 Testing, Smart Contract Integrations, DApp Wallet Flows

Remote

– Conducted end-to-end testing of blockchain/Web3 applications; identified and documented **security vulnerabilities, race conditions, and edge cases** in DApp wallet flows and smart contract integrations.

PROJECTS

- ClawRoute — Open-Source LLM Cost Router (80+ GitHub Stars, 13 Forks)

Feb 2026

TypeScript, Node.js, Hono, SQLite, OpenAI / Anthropic / Google Gemini / DeepSeek APIs

GitHub

– Built a **local HTTP proxy** that intercepts LLM requests, classifies task complexity with **sub-5ms local heuristics**, and auto-routes simple tasks to cheap models and complex ones to frontier models — **60–90% API cost reduction** with automatic escalation on failure.

– Works with **any OpenAI-compatible client**; ships a real-time savings dashboard, per-request SQLite cost tracking, and Dry Run mode. Reached **80+ stars organically within weeks** of launch.
- FinalWhistle — On-Chain Sports Settlement Oracle & Prediction Markets

2026

TypeScript, Solana, TxODDS TxLINE

GitHub

– Built a **verifiable World Cup settlement oracle** with **in-play prediction markets on Solana**, consuming live TxODDS TxLINE data feeds for trustless, real-time match settlement.
- ChainCaster — AI Agents & Staking for Live Game Streams

2026

TypeScript, Avalanche C-Chain, Smart Contracts, AI Agents

GitHub

– Designed a protocol that deploys **autonomous AI agents into live game streams** — viewers earn by staking on real-time outcomes, streamers earn from participation pools, all **settled trustlessly on Avalanche C-Chain**.
- NFT Marketplace — Kaspa Blockchain (Client Project)

Sept – Oct 2024

Solidity, Kaspa, Next.js, Express.js, MongoDB, KasWare Wallet

Fiverr

– Developed a **full-stack, white-label NFT marketplace** for an organization on the Kaspa blockchain with **KasWare wallet integration** for KAS-token payments and donations; Next.js frontend, Express.js + MongoDB backend, used by real clients for live NFT sales.

TECHNICAL SKILLS

- Languages:

TypeScript · JavaScript · Solidity · Python · C/C++ · SQL
- Frontend:

React · Next.js · HTML/CSS · Wagmi · Viem · Ethers.js
- Backend & APIs:

Node.js · NestJS · Express.js · Hono · Socket.IO · REST APIs · Redis Pub/Sub
- Blockchain:

Ethereum · Solana · Polygon · Kaspa · Avalanche · ERC-20/ERC-721 · LayerZero · Chainlink · Hardhat · Foundry
- Databases:

PostgreSQL · MongoDB · Redis · SQLite
- Auth & Security:

JWT · OAuth2 · WebAuthn Passkeys · TOTP 2FA · Role-Based Access Control · Smart Contract Auditing
- Tools & Cloud:

Git/GitHub · Docker · Vercel · Postman · VS Code

KEY COURSES TAKEN

- CS & Maths:

Data Structures & Algorithms, Operating Systems, Computer Organisation & Architecture, Database Management Systems, Computer Networks
- Specialization:

Cloud Computing, Data Science, Machine Learning

ACHIEVEMENTS

- ClawRoute — 80+ GitHub Stars, 13 Forks

— open-source LLM router, grew organically within weeks of launch | **GitHub**

2026
- 3+ Years of Freelance Delivery

— 5-star rated Web3 developer on Fiverr, clients across 10+ countries

2023–Present
- 35+ Public Repositories

— spanning DApps, smart contracts, developer tooling, and full-stack apps | **GitHub**

2026
